INSIGHTS

We see vastly more movies than TV Shows On Netflix

The most prolific producers of content for Netflix are primarily the USA, with India and the UK a significant distance behind. It makes sense that USA produces the most content as after all, Netflix is a USA company.

Netflix in USA contributes maximum towards movies. We observe that some ratings are only applicable to Movies. The most common for both movies and TV shows are TV-MA and TV-14. We see a slow start for Netflix over several years.

Things begin to pick up in 2015 and then there is a rapid increase from 2016. It looks like content additions have slowed down in 2020, likely due to the COVID-19 pandemic.

Black Mirror: Bandersnatch is among the movie shows that has the longest movie duration (312 minutes)

Dramas, International Movies, Documentaries and Stand-Up Comedy are the top 4 genres
